

# ZT Safety Harness

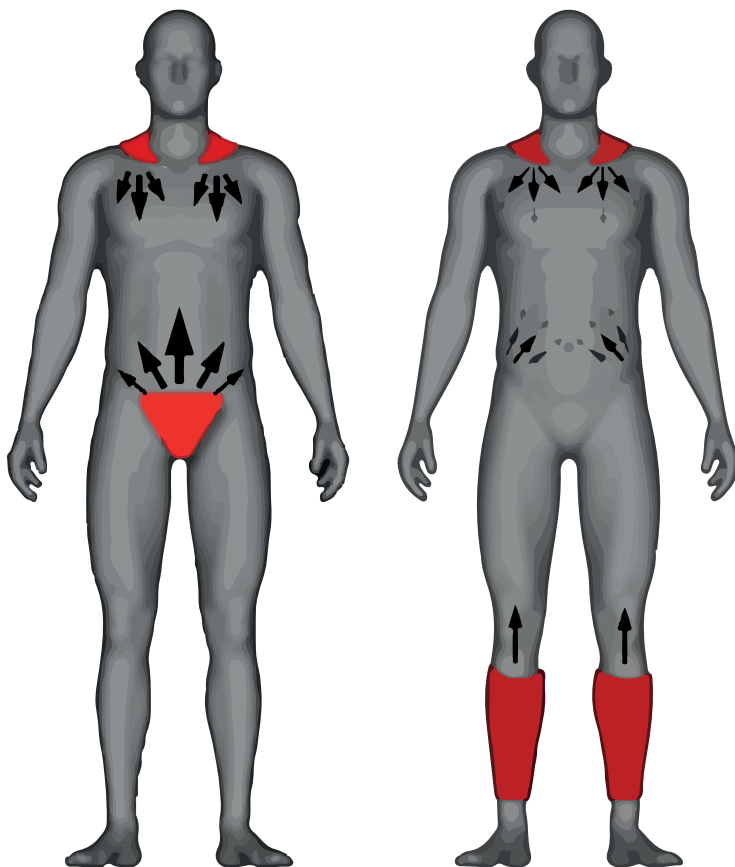

## Ready for Action!

The only fall arrest and restraint harness built in to fire retardant clothing that can eliminate suspension trauma and has no groin straps.

**In the event of a fall the calf gaiter clenches, pulling the legs up and taking the user in to a seated position where the blood can flow freely to the major organs.**

- Reduces fall arrest forces by up to 40%
- No restriction to the femoral artery
- Comfortable unisex design
- Fully intergated in to workwear
- Fall arrest & work restraint
- Improved ability to self rescue
- Certified to 150kg / 22.5stone /330lbs

**Conventional harness**

**ZT harness**

**The fall forces are distributed evenly around the body so there is far less risk of damage.**

Certified to 150kg Bodyweight  
(approx 23.5 stone/330lb)
